The contributors to this issue are Susan A. Libbin and H. Christine Collins. Principal coordinators are Robert L. Tontz, Thomas A. Warden, and Thomasine B. McCall, Statistics Program Area, Foreign Demand and Competition Division, Economics, Statistics, and Cooperatives Service, Washington, D.C. 20250

U.S. Agricultural Exports Reach Record \$20.5 Billion In First 9 Months (see p.5)

Farm product exports continued strong in June, with \$2.73 billion moving abroad. During the first 9 months of fiscal 1978, export value totaled \$20.5 billion, compared with \$19 billion a year earlier. With increased tonnages of corn, wheat, and soybeans accounting for most of the increase, the agricultural trade surplus widened to almost \$10 billion.

U.S. Farm Imports Rise 2 Percent During First 3 Quarters of Fiscal 1978 (see p.34).

During October 1977 to June 1978, U.S. agricultural imports were valued at \$10.5 billion, 2 percent higher than a year ago. Value declines in imports of coffee, tea, sugar, and vegetable oils were more than offset by gains in cocoa beans, cocoa powder, chocolate, dry rubber, cattle, dairy products, meat and products, fruits, vegetables, tobacco, wine, and malt beverages.

U.S. Agricultural Exports And Transshipments (see p.59). After adjustments for intransit bulk commodity movements through Canadian and West European ports, U.S. farm product exports to the European Community in 1977 totaled \$6.37 billion, about \$250 million less than unadjusted exports. Most of the \$328 million in transshipments through Canada were bound for Western European destinations, followed by Asia, Africa, and Eastern Europe. Other major transshipment points were Holland and West Germany.

Selected Prices of International Significance (see p.67). International commodity prices strengthened in early June but proceeded to head downward during the latter part of the month. Wheat and rubber experienced price rises in June. Prices for corn, rice, soybeans, sugar, and cocoa beans declined while cotton remained steady.

U.S. AGRICULTURAL EXPORTS REACH RECORD \$20.5 BILLION IN FIRST 9 MONTHS

Continued strong exports of farm products in June raised the 9 month cumulative value to a record \$20.5 billion, 8 percent above the \$19 billion shipped during similar months last year. June's export total approached May's record \$2.73 billion, and was \$760 million more than the \$1.88 billion shipped during June 1977.

October-June 1977/78's agricultural trade surplus widened to almost \$10 billion, compared with \$8.64 billion in the first 9 months of fiscal 1977. The record \$1.5 billion trade surplus for June topped May's \$1.45 billion.

Cumulative export tonnage of principal commodities during October-June 1977/78 rose 14 percent above year earlier rates to 94.5 million tons. Corn, wheat, and soybeans accounted for most of the increase.

Grain exports during June moved up to \$1.18 billion from \$1.15 billion in May and only \$717 million for June 1977. Coarse grain shipments set a new monthly record at nearly 5.8 million tons, mainly to the U.S.S.R., Japan, and Eastern Europe. For the October-June period, corn exports totaled 35.7 million tons versus 33 million tons the same months of 1976/77.

Wheat exports continued large in June at nearly 3 million tons, but did not reach May 1978's 3.27 million ton rate. Over the 9 month period, wheat exports were 39 percent above their year-earlier level--22.1 million tons, compared with 15.9 million tons shipped the year before. The steep increase resulted primarily from heavier shipments to Brazil, the U.S.S.R., the European Community (EC), Morocco, Pakistan, Nigeria, Venezuela, the Philippines, Taiwan, Algeria, and Colombia.

Strong foreign demand has contributed to an increase in wheat prices over the last several months. Export unit values in June averaged \$127 per ton for all grades against \$115 in June 1977. May 1978 unit values averaged \$125 versus about \$114 in May 1977.

In June, rice exports recovered somewhat from May's depressed 155,000 ton level to 293,000 tons. October-June 1977/78 rice export volume matched its previous years' level of 1.56 million tons, but higher prices pushed the value up 25 percent to \$603 million. Indonesia, Saudi Arabia, Nigeria, Iraq, and Bangladesh accounted for increased export tonnages, while shipments to Iran and Korea fell.

During October-June, oilseed and product exports topped their year-earlier value by 10 percent, exceeding \$6 billion. Soybean value rose 4 percent to almost \$4 billion, reflecting a 23 percent volume increase to 16.6 million tons and somewhat lower average per unit prices. Soybean export unit values averaged \$239 per metric ton over the October-June 1977/78 period, compared with October-June 1976/77's \$284 per ton. Larger quantities moved principally to the EC, Japan, Spain, Taiwan, and Mexico.

Soybean meal exports for October-June surged 30 percent above 1976/77's pace to nearly 4.5 million tons. Value advanced 14 percent to \$873 million. A substantial part of this increase occurred in June when 490,000 tons were shipped, compared with 217,000 tons in June 1977. EC countries and Eastern Europe took larger amounts. Relatively favorable soy meal prices this year, and increased feeding rates in industrial countries, have contributed to the higher export levels.

Other farm commodity export increases this year included fresh and prepared fruits, edible nuts, vegetable oils, beef, poultry, and seeds.

1/ PRELIMINARY

U.S. FARM IMPORTS RISE 2 PERCENT DURING FIRST 3 QUARTERS OF FISCAL 1978

During October 1977 to June 1978, imports of agricultural products were valued at \$10.5 billion, 2 percent higher than a year ago. Value declines in imports of coffee, tea, sugar, and vegetable oils were more than offset by value gains in imports of cocoa beans, cocoa powder, chocolate, rubber, cattle, dairy products, beef and meat products, fruits, vegetables, tobacco, wine, and malt beverages.

Throughout the first 3 quarters of fiscal 1978, imports of noncompetitive products were valued at \$5.1 billion, 6 percent less than a year ago. The main decline was in imports of green coffee which declined 17 percent in value and just slightly less in volume. Since January 1978, unit import prices of coffee have declined steadily.

Imports of cocoa beans and cocoa powder registered the largest value gains among noncompetitive products, mainly due to price inflation. Unit import prices for cocoa beans rose about 47 percent, while cocoa powder prices more than doubled from a year earlier.

From October 1977 to June 1978 imports of competitive products were valued at over \$5.4 billion--11 percent higher than a year ago. Except for vegetable oils, sugar, and edible nuts, all major competitive imports increased.

Due to declining U.S. production and a recent increase in the voluntary quotas, substantial gains occurred in imports of beef and veal. They totaled \$771 million, 29 percent higher than a year ago. Unit import prices of fresh and frozen beef and veal increased by 11 percent.

Imports of vegetable oils (chiefly coconut and palm oils) fell by nearly one-fifth from a year earlier. A rise in import prices increased U.S. domestic supplies and competitive prices between some domestic and imported oils have reduced the incentive to import.

For the first 3 quarters of fiscal 1978, imports of sugar were valued at \$613 million, 6 percent below a year earlier, despite record December imports of \$185 million. Higher import fees and duties have reduced trade.

For the first 3 quarters of fiscal 1978, four countries--the Philippines, Brazil, Australia and the Dominican Republic--supplied about two-thirds of all U.S. sugar imports. The Philippines has been the leading supplier, providing 23 percent of the total. With increased production in Brazil, U.S. imports from that country rose from \$18 million to \$96 million. Substantial declines occurred in sugar imports from the Dominican Republic and Guatemala, mainly due to their removal from duty-free treatment.

1/ PRELIMINARY

U.S. AGRICULTURAL EXPORTS AND TRANSSHIPMENTS

U.S. agricultural exports to most regions are affected by transshipments through Canadian and Western European ports. After adjustment for intransit bulk commodity shipments, farm product exports to the European Community (EC) in 1977 totaled \$6.37 billion versus an unadjusted value of \$6.62 billion. Other Western European countries received \$1.9 billion, compared with \$1.74 billion before adjustments. Adjusted exports to Eastern European countries amounted to \$894 million against \$604 million in direct exports. 1/ Transshipments to African countries, mainly through Canada, raised the export value to \$1.39 billion from \$1.36 billion. Over \$69 million in agricultural items moved through Canada to Asian countries.

During 1977, transshipments of U.S. farm products through Canadian ports declined in value to \$328 million from \$393 million a year earlier. However, prices accounted for the reduction, since volume increased about 5 percent to 3.1 million tons. Reduced grain and oilseed shipments to EC members and Eastern Europe were more than offset by larger movements to other Western European countries, Africa, and Asia.

Transshipments through Canada to EC members totaled \$102 million in 1977, down sharply from \$165 million during 1976. Smaller tonnages of wheat and soybeans, coupled with declines in average unit values, yielded lower values for all commodities.

In 1977, intransit U.S. agricultural commodities through Dutch ports rose to an estimated \$646 million. About 14 percent in value above their year-earlier rate. Volume remained about the same at 3 million tons. Increases occurred for wheat, barley, rice, grain sorghum, sunflower seed, and protein meal, which offset declines for corn and soybeans. Over 87 percent of the transshipment value through Dutch ports went to other EC destinations, primarily West Germany and the United Kingdom.

U.S. grain and oilseed transshipments through West Germany fell sharply in 1977 from the more than 3.2 million ton level reached during 1976. Substantially lower demand for wheat and corn by East Germany and Czechoslovakia accounted for the decline. Consequently, just over \$280 million moved through North German ports in 1977, compared with \$440 million in year earlier.

1/ For unadjusted exports by destination see the June 1978 issue of Foreign Agricultural Trade of the United States, pp. 11-30.

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

International commodity prices strengthened in early June but proceeded to head downward during the latter part of the month, as traders assessed the economic scenario for the upcoming marketing year.

The smaller 1978 U.S. wheat crop, continued strong export demand for U.S. wheat, the pulling of wheat stocks out of commercial markets into the Reserve Program, and the slowdown in the transportation to the Gulf--resulting from a shortage of boxcars--outweighed the bearish price effect evident at the onset of harvest.

At the Gulf, the U.S. export price for wheat averaged \$129 a metric ton, up slightly from May. The Rotterdam price for U.S. Hard Winter wheat and Canadian Western Red Spring wheat were also buoyed by these bullish factors, while the price for Dark Northern Spring wheat declined slightly in Duluth and Rotterdam. Since April, the price spread between the U.S. ports and Rotterdam have continued to be wide because of strong export demand, particularly since the United States is currently the only country with sizeable quantities of grain for export; other major exporting countries are currently "booked out" until their respective upcoming harvests.

Prospects of a continued heavy carryover of corn, coupled with the recently improved growing conditions for the upcoming corn crop, pulled the June Gulf ports price down to \$111 a ton. The price spread between the Gulf ports and Rotterdam stayed at \$9 a ton, the same as it has been since April. The Rotterdam price for grain sorghum has also declined.

The Gulf price for soybeans declined 7 percent to \$266 a ton, as fears of an extremely tight end-of-year stock situation diminished somewhat and the outlook for a recovery in soybean production develops. The Rotterdam price for U.S. soybeans and soybean meal also declined, but the price spread between Gulf ports and Rotterdam increased in June--indicating strong West European import demand during that month.

The Osaka price for U.S. Arizona cotton remained at 71 cents a pound, the same as in May. The United States, which has enjoyed a strong export demand for cotton, is expected to end the August-July marketing year with substantial cotton stocks. Among import commodities, imported beef experienced a 12 percent price decline to 90 cents a pound. Omaha slaughter steer prices also declined in June as U.S. cattlemen stepped up the number of cattle placings in feedlots, but the U.S. domestic price did not fall to the same extent as imported beef.

The Caribbean ports price of raw sugar also declined slightly to 7.2 cents a pound because of the large world stocks of sugar.

The New York cocoa bean futures price also began its decline as the supply of cocoa beans became more plentiful. In contrast, the New York spot price for coffee increased slightly as traders looked for bearish news of damaging frosts in Brazil. In late June, however, buyers were more cautious in their assessment of the Brazilian coffee situation and the New York spot price again declined. The New York spot price for crude rubber rose 8 percent to 49 cents a pound.

According to the International Rubber study group, there will be a slight shortfall in world rubber stocks, both natural and synthetic, in 1978. World stockpiles of natural rubber are expected to be drawdown by 70,000 tons. This compares with 1977 stockpile use of 100,000 tons of natural and 45,000 tons of synthetic rubber. Estimated world

stocks of natural rubber for December 31, 1978 are 1,400,000 tons, compared with 1,470,000 for January 1, 1978 and 1,570,000 tons for January 1, 1977. Estimated world stocks of synthetic rubber for the same time period are 1,615,000 tons, 1,650,000 tons and 1,695,000 tons, respectively.

In June, wheat, corn, grain sorghum, rice, cotton, imported beef, and crude rubber were priced higher than they were a year ago, while sugar, coffee, cocoa beans, soybeans, and soybean meal were lower.

Table 24--U.S. agricultural exports and imports: Value by country, April-June 1977 and 1978--Continued

	Country		Exports		Imports		Country		Exports		Imports	
	1977	1978	1977	1978	1977	1978	1977	1978	1977	1978	1977	1978

1/ Totals may not add due to rounding.

2/ New classification effective January 1, 1977, formerly classified separately as North Vietnam and South Vietnam.

3/ New classification effective January 1, 1978.

4/ Country name change effective January 1, 1977.

5/ Country name change effective January 1, 1978.

6/ New classification effective January 1, 1978, formerly included under French Indian Ocean Areas.

7/ Country name change effective January 1, 1978.

8/ Transshipments through Canada where final destination was not known at the time of export.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS: The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and aircraft engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters through 1974. USDA payments are excluded from the export value. Separate statistics on Government Program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country known to him at the time of shipment from the United States. Shipments of certain U.S. grain from Great Lakes ports to Canadian ports are designated as exports to "unidentified countries." Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS: Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
